

NORSEMAN MANHOLE COVERS

NORSEMAN MANHOLE COVERS. JOB SITE AND ENVIRONMENTAL PROTECTION.

Norseman's Manhole Covers are an effective way to create a protective barrier between water systems and the environment. During construction and maintenance, these can help keep debris and other contaminants out of sewer systems, and to keep gases from entering the environment. Norseman Manhole Covers are durable and reusable, made from 18 oz vinyl materials in a bright yellow colour for maximum visibility and safety.

Features

- Effective temporary solution to stop debris from entering sewer systems during plant shutdowns and/or new construction site developments.
- It helps to prevent gases found in sewer systems from entering the environment.
- Manufactured in bright yellow fabric for maximum visibility and safety for workers.

Specifications

- Available in two styles: round with silica sand filled perimeters and carry handles and flat with a 5/8" rope in the perimeter.
- Custom sizes available to meet site requirements.

GEAR POINTS: Features specifically designed to ensure Norseman Gear outperforms on your next job-site.

PROTECT

Stop contaminants from entering the sewer system and gases from escaping.

WITHSTAND

18 oz. bright yellow vinyl is highly visible, resilient and able to withstand tough construction conditions.
